It’s been quite a ride since 1915, and things really have changed a great deal along the way. At the very same time, it is truly comforting to know that some things haven’t changed one bit around here – and probably never will. We’ll still have those hills to climb. We’ll still have that crystal-clear goal of delivering the finest lines in the world.

It is with great pride that we present to you our 2009 Sportfishing Catalog. It is packed with our latest and most cutting-edge products helping enjoy your time on the water. Also notice a few time-tested favorites that we, and our faithful customers, just can’t seem to say goodbye to. Cortland Lines. Over 90 years of making the finest lines in the world, fished the world-over.

New for 2009, Cortland has again raised the bar with superbraid construction and technology. Cortland is proud to introduce C16 Spliceable Superbraid. Constructed using high-tech Spectra fibers in a 16 carrier construction for an extremely small diameter to strength ratio. C16’s, 16 carrier braid construction and uniformed pick count (wraps per inch) is the perfect match for allowing you to quickly splice a few feet of mono, while maintaining line strength between the braid and the top shot. Cortland has also treated C16 with their proprietary FIBER TECH Superbraid Protection that dramatically increased the braid’s durability and ensures consistent performance over time.

**CORTLAND C16 - "SPICEABLE" SUPERBRAID**

New for 2009, Cortland has again raised the bar with superbraid construction and technology. Cortland is proud to introduce C16 Spliceable Superbraid. Constructed using high-tech Spectra fibers in a 16 carrier construction for an extremely small diameter to strength ratio. C16’s, 16 carrier braid construction and uniformed pick count (wraps per inch) is the perfect match for allowing you to quickly splice a few feet of mono, while maintaining line strength between the braid and the top shot. Cortland has also treated C16 with their proprietary FIBER TECH Superbraid Protection that dramatically increased the braid’s durability and ensures consistent performance over time.
Cortland Master Braid - "STIFF SUPER BRAID"

With almost 100 years of braiding experience and craftsmanship, Cortland is proud to offer the next generation of "Premium Super Braid" - Master Braid. A premium super braid constructed using all the best features of Cortland's legendary Spectron braided line, but with a unique coating that makes the braid "stiffer" and more durable. Master Braid is constructed to make it rounder, which means less twist, greater accuracy, longer casts and extended life. A proprietary Cortland process blends the colors and finish into the fibers of the braid eliminating dulling or flaking of the color and stiffening agent. With only 4% weight, a small diameter pound-test ratio and a unique hydrophobic coating that slides through the water and comes back dry, this new Master Braid delivers greatly enhanced fishing qualities and performance. Master Braid is very easy to use and works equally well on both spinning and conventional reels.

**STIFF SUPER BRAID**

- **Targeted Configuration 4%**
  - **Stiff**
    - 100 yards: 10, 15, 20, 30, 50, 65, 80
    - 200 yards: 10, 15, 20, 30, 50, 65, 80, 100, 130, 200
    - 300 yards: 10, 15, 20, 30, 50, 65, 80, 100, 130, 200
    - 400 yards: 10, 15, 20, 30, 50, 65, 80, 100, 130, 200
    - 500 yards: 10, 15, 20, 30, 50, 65, 80, 100, 130, 200
  - **Super**
    - 100 yards: 10, 15, 20, 30, 50, 65, 80
    - 200 yards: 10, 15, 20, 30, 50, 65, 80, 100, 130, 200
    - 300 yards: 10, 15, 20, 30, 50, 65, 80, 100, 130, 200
    - 400 yards: 10, 15, 20, 30, 50, 65, 80, 100, 130, 200
    - 500 yards: 10, 15, 20, 30, 50, 65, 80, 100, 130, 200

**SPECTRON® “STRENGTH OF STEEL”**

Why is Cortland Spectron considered the best Super Braid in the industry? Our braiding technicians have combined specific critical elements to maintain the optimum number of strand per yard for this high performance polyethylene fiber. The result is a multi-strand braid that combines low stretch 4% with small diameter pound-test ratio. The extra strong body is perfect for casting unique skills, hydrophobic nature allows Spectron to slide through the water and come back to you dry.

**SPECTRON® BLACK Spot**

- **SPECTRON® BLACK Spot**
  - 100 yards: 35, 50, 65, 80, 100
  - 200 yards: 50, 65, 80, 100, 130, 200
  - 300 yards: 50, 65, 80, 100, 130, 200
  - 400 yards: 50, 65, 80, 100, 130, 200
  - 500 yards: 50, 65, 80, 100, 130, 200

**SPECTRON® SUPERBRAID PROTECTION**

Cortland’s proprietary FIBER® TECH super braid protection treatment was scientifically developed and tested to ensure consistent performance, color, feel, line stiffness along with extreme durability. The FIBER® TECH treatment penetrates the entire braid, not just the surface to ensure the braid is treated and protected inside and out.

Hi-Vis Yellow IGFA

A solid, stainless steel alloy line made for strength! Designed to resist tangles and knots.

Spools: 2700 yd.

Tests: 13, 16 and 20 lb.

Tests: 13, 16 and 20 lb.

KERPLUNK PREMIUM LEAD CORE

Where you need super tough nylon is braided over a lead core then dyed a different color every ten yards. Best may be the perfect trolling line!

Spools: 100 yd. and 2710 yd.

Tests: 14, 18, 27, 36, 45 and 60 lb.

Tests: 1, 2, 3 and 6 ft. of lead core (let out) = 1 ft. diving depth

(Meaning that 1 color = 5 ft. diving depth)

18#-60# Kerplunk is made on the same size lead core

BRIGHTER COLORS
Many years ago spiny water fleas invaded the Great Lakes watershed and made life miserable for trollers in three states! As the water warmed in late summer, billions of these exotics appeared, attaching themselves to any fishing line that came by! We started working with charter captains and avid anglers in Lake Ontario and soon developed a revolutionary premium grade light green mono with a special shape and high slip additive that is proven to reduce or eliminate the problem of water flea attachment to troller’s lines. Now we’re heroes!

**Spool:** 300 and 2500 yard
**Test:** 20 and 30 lb.

**MIRACLE**

A miracle in performance and value! High impact strength and superior knot strength make this line a great value.

- Color: Clear
- Spool sizes: 6/100, 600, 1200, 1500, 1800, 2200, and 4000 yd.
- Tests: 4, 6, 8, 10, 12, 15, 20, 30, 40, and 50 lb.

*Cortland technicians are proud to offer a premium clear monofilament fishing line - **Master Mono**. Master Mono is an all-conditions, extremely supple - easy handling monofilament fishing line formulated with unique additives that enhance durability and abrasion resistance. Most anglers today demand a premium monofilament for most fishing conditions that they encounter. If you are picking one premium monofilament, make it *Cortland Master Mono*.*

- Color: Clear / Hi-Vis Yellow / Hi-Vis Orange
- Spools: 300 / 2400 yards
- Tests: 4, 6, 8, 10, 12, 15, 20, 25, 30, 40, and 50 lb.

**CAM-O-FLAGE**

Why are fish spooked by the fishing line? A continuous connection leading out of your lure or bait has fish shouting wrong to any wary fish. Cortland solved this problem by dyeing Cam-O-Flage mono every two feet to break up the connection and putting fish off guard. Make sense? Get away from the past knot strength and super toxic chemicals of Fluorocarbon mono that’s made overseas! Try U.S. made Cam-O-Flage the next time you need to fool keen eyed fish in clear water.

- Color: Clear
- Spools: 4 - 30 pound
- 2 - 10 pound / 110 yd. spools
- 2 - 20 pound / 300 yd. spools
- 25 pound / 250 yd. spools
- 30 pound / 210 yd. spools
- 2 - 20 pound / service spools

**Endurance "Super Premium" Mono**

Cortland Line is proud to offer a technologically advanced “Super Premium” monofilament fishing line – Endurance Mono. With advanced high quality features that can directly improve a fisherman’s performance and success. The line diameter and glass smooth finish allows for an extremely low co-efficient of friction resulting in ultra smooth casts and retrieves and a ultra sensitive “feel” while the line slides through the water.

Endurance Mono is formulated with unique additives allowing for remarkable abrasion resistance and superior knot strength. When it’s time to endure the toughest fishing conditions, and be confident, make sure you’re using the line that will endure it all – Cortland Endurance Mono.

- Color: Clear / Hi-Vis Yellow / Hi-Vis Orange
- Spools: 300 / 2400 yards
- Tests: 4, 6, 8, 10, 12, 15, 20, 25, 30, 40, and 50 lb.
BRAIDED LINES

MUSKY MASTER®
Made from our time-tested, abrasion resistant, low stretch Micron fibers. MUSKY Master’s precision braiding and precise pick placement means super knot strength and fewer break-offs when casting heavy “musky-sized” baits.
Available in low-vis black finish, Musky Master is the line Musky masters across the U.S. have relied on for nearly half a century.
Spools: 100 and 1200 yd.
Tests: 10, 15, 20, 25, 30, 35, 42 and 50 lb.

BRAIDED NYLON
Still the most abrasion resistant line you can use, our Braided Nylon boasts super castability and a controlled stretch that has made this line the choice of the serious baitcaster for over 60 years! Available in low-vis black and the exclusive Cortland “Camo” Colors:
Colors: Black
Spools: 100 yd.
Tests: 12 (black only), 15, 20, 25, 30, 35, 42 and 50 lb.

WALLEYE THREE-COLOR TROLLING LINE
The perfect in-line sinker system for the troller who needs to hit the depth! Cortland’s WALLEYE Three-Color Trolling Line features color changes every ten yards and a tough abrasion resistant extensible cord.
Length: 100 yd.
Tests: 14, 18, 20, 25, 30, 35, 42 and 50 lb.

Duck Decoy Cord
Easy to tie, not resistant and economical.
Length: 100 ft.
Color: Black

CATFISH LINE
Need a tough, economical braid that will stretch just enough? Here it is:
12 spools - 50 yards each
Color: Assorted
Tests: Assorted (18 thru 117 lb.)

Bow Fishing Line
Bow hunters are getting out of control! Stingrays, alligator gar, what next? We’ve really tackled, low stretch and testing at 72 pounds.
Length: 50 ft.
Tests: 72 lb.

ICe FiSHING

Camo Ice Mono
Cortland’s Camo tippet material is designed to be highly abrasion resistant and yet supple enough to prevent the normal chafing of monofilament in cold weather. Like Cortland’s other Camo products, Camo Ice is dyed different camouflage colors every two feet to literally “catch” them off guard. Great for clear water where fish have become especially line shy.
Spool: 110 yd.
Tests: 2, 4, 6 and 10 lb.

Vinyl Coated Tip-Up Line
If you were to design the ideal tip-up line for freezing temperatures what would you include? How about pliable braid (easy handling), vinyl coating (no freezing), and dark color (low-visor)? We asked top ice fishing experts their opinions and guess what? It’s the same as ours!
Spool: 100 ft.
Tests: 20 lb.

Hi-Vis Ice Mono
Premium monofilament designed especially for the rigors of ice fishing. The hi-visibility helps you see it down the hole while jigging. Abrasion-resistance agents keep it supple and prevent it from becoming line shy on jagged ice edges.
Spool: 100 meter, 110 yard mono.
Tests: 2, 4, 6 and 10 lb.

Braided Ice Line
Specially crafted braid that resists kinking in cold temperatures. We’ve also made it water repellent to resist freezing and it’s proved right to boot!
Colors: Black and Tan
Spool: 50, 100 and 150 and 1200yd.
Tests: 20, 27, 36 and 45 lb.
(20# not available in 1200 yard spools)
(Tan not available in 100 yard spools)

Tungsten Ice Flies
Unique to the market are Cortland’s Pro Select Ice Flies. These Tungsten Beadhead Nymphs are hand tied, and have not been available to the regular ice fishing market but have been sought out in fly shops and top ice fishing... for years as a top producing ice fly. Available in 3 different 4 packs.

ENDURANCE BLANK COMPOSITION

3 Layers of HM45 Million Graphite rolled together during blank production
Ultra thin external graphite fiber, increasing the overall strength of the rod and providing a distinctive look.
**CUBBY JIGS**

Glow Cubbies

“Ultimate glow soft plastic lures have been an off-white opaque (not clear) color and only glowed green. TRANS-GLO Mini-Mite tails are translucent (see-through) and glow not only in green, but in green, blue, orange or pink.

**TRANS-GLO Mini-Mites**

The tails glow from the inside giving the tail a three dimensional glow when seen from any angle. No unnatural afterglow like from all previous glow lures.*

Glow lures have always been a favorite for night fishing but fishermen have been limited to one tail color and glow color. Now, with TRANS-GLO Mini-Mites you have a choice of tail and glow colors to fit different conditions.

For daytime use, TRANS-GLO Mini-Mites give you an advantage over non-glow lures by making the lure easier to see in murky or clear water but tail colors are enhanced by the glow, making the tail a brightener or patentable in dark or clear water.

**TOOTHY CRITTER TIE-ABLE STAINLESS STEEL LEADER**

Chasing after pike, muskie, bluefish and barracuda requires special tackle. Even the toughest gear is useless against those razor sharp teeth unless you are fishing with a leader material that can stand up to the task.

Cortland Line Company introduces Toothy Critter, the finest tie-able stainless steel material available for fishing. Aptly named, Toothy Critter is tough as steel (because it is) a leader material that is supple enough for tying but tough enough for even the most razor sharp teeth. Conventional knots work fine.

**CORTLAND FITTED HAT**

Adjustable Calvary Twill Fabric Navy with silver embroidery

**CORTLAND BANNER #654174**

Heavy Duty Vinyl Corner spot

24” x 36”

**CORTLAND TACKLE DECAL #660403**

Heavy Duty Vinyl

Transparent

2” x 6”

**EXTRAS**

**HOOD-EYE CLEANER #663008**

Ultra sharp points allow you to clean out painted or dirty hook eyes for easier line threading. Points may have to be adjusted with use on different hook sizes.

**SUPER BRAID SCISSORS #662919**

Specially designed scissor will cut all types of super braid with ease. Stainless steel blades will resist corrosion.

**CURVED JAW FORCEPS #650695**

Useful for the fly tier or as a swivelled tool. Rust proof stainless steel, 5-1/2”.

**ROTATING HOOK SHARPENER #651470**

A rotating diamond sharpening stone creates a needle sharp hook point each time. Turns your dull or inexpensive hooks into laser-like sharp hooks with just a few turns of the spindle.

**DINSMORE WEIGHT SYSTEM**

Available in weight forward Egg Shot design. This cushioned tip gives an angle high performance without the toxicity of lead. Available in single sizes and multi-size dispenser.

**FOLDING NETS**

These lightweight aluminum nets are available in folding handle models or telescoping and folding handle models. These premium quality nets feature a soft rubber front to protect fish and come with a warranty. Grab one today. Available in #4, #6 and #8.

**CX SPINNING REELS**

Both casual and serious anglers are always on the lookout for a high quality value priced spinning reel. Cortland is proud to introduce an all new spinning reel selection that will meet the needs of most anglers, fresh and salt. The Cortland CX spinning (fixed spool) reels feature two ball bearings in the Ultralight model and four ball bearings in the larger models, and infinite reverse with a large line roller and a balance rotor - all provide you with one of the smoothest, most reliable reels available. Available sizes include Ultra-light #4, #6, #8 and #10.
