

# PINHEAD

## TAKES ONE TO KNOW ONE!

New for 2012 is the Seeker Pinhead Series

Imagine being 13 again and going fishing on your first half day trip. You see the bait tank, you smell the diesel fumes, you see the deckhands getting your gear ready for the day's fishing. That was the day you decided that fishing was a part of your life that would never go away. "Pinheads" are the kids that get invited to go fishing on the boats by the captain or crew. They are the young men and women who get to learn from some of the best fishermen along the coast. They are the ones that you find helping passengers, scrubbing the boat after a long day's fishing, and other chores aboard the boat. They are the ones that on a good day, may share in the crew's tips if luck is on their side. It is the "Pinhead" that started so many on their path to great fishing, great catching, and lives full of experiences that can never be traded.

The "Pinhead" series is dedicated to everyone who, at some time in their lives, proudly wore the name as a badge of honor. From those who are in their teens now to those who are in their 60's, if you have ever been a Pinhead, you will love these rods. They're the ultimate in simplicity. There are 5 of the best Southern California local rod actions. They are built from military spec S-Glass for durability. They are wrapped with traditional chrome over stainless guides. The clean yet very appropriate double wrap of black over black is sure to bring back some memories. Finally, the grip used for the "Pinhead" is the choice of skilled fishermen everywhere. It is made of 1" wide cork tape and finished with an artistic "Turks-Head" knot and a "Daisy" type rubber butt-cap. Not only is the rod incredible but the "Pinhead" mascot is a real work of art in a literal sense. World Renowned artist, Matt Koch, has created the "Pinhead" which is on each of the rods in the series. Because of this, the rods are going to become collectible.

These rods are definitely going to hit home for both parents and their Pinhead sons and daughters. They are modestly priced under \$200 for each of the 5 models including a 9'3" 30lb test surface iron jig stick! Never has there been such a great value for a classic rod.

100% Military Spec S-Glass  
Chrome Plated Ring Guides
