

The Super Seeker blank is the MOST refined saltwater fishing rod blank available on the market today. Its construction consists of military spec 120g longitudinal graphite fiber and S-Type fiberglass. No other rod made today combines those two materials. Each model from the Super Seeker line represents the latest in the evolution of the fast taper rod. You will undoubtedly find more blanks than built rods. We have given a slight advantage to our custom rod builders by providing unique actions not currently found in our finished rod lineup.

Like all of the Seeker product, our blanks are coated with a polyurethane* UV inhibitor coating which protects the graphite and glass fibers as well as provides an amazing glossy finish for the life of the blank.

Building custom rods on Super Seeker blanks...The ultimate!

Sys #	Model #	Line Rating	Length	Tip	Butt Dia.	Finished Rod Equivalent

*-Polyurethane coatings require the use of denatured alcohol during the clean up of the blank in lieu of the traditional acetone. Acetone is a polyurethane dilutant and will breakdown the finish of the blank. Please take note as our warranty does not cover the finish and the use of acetone.
