

Introducing New Products

RRM2

Wrap thread with consistent tension, even release your hands while wrapping!
Use 3 different colored threads at the same time, no hassle even with complicated projects.

Wrap with consistent tension, coat with uniform thickness & no air bubbles.

FFM2

This motorized coating dryer/finishing motor is made of steel, not wood for increased stability when oscillating. The uniquely designed chuck holds blanks of various diameters firmly. The FFM2 is stackable for easy storage. Experienced as well as beginning custom rod builders will find this dryer easy to work with, producing finishes with uniform thickness.
