

Diamondback All American®
Handcrafted in the USA

In the world of angling, few blanks have become as distinctive and recognized around the world as Diamondback. Handcrafted in a state-of-the-art production facility, every Diamondback blank is the collaborative result of a highly skilled group of dedicated craftsman that, like you, loves to fish.

New State-of-the Art Blanks from Seeker

The combination of Super "S" Glass 120-gram graphite and the latest epoxy Eho4 resin system make these blanks the most powerful, strongest and fastest recoiling we've ever built.

When you're fishing for 200 and 300-pound yellowfin tuna, you're looking for great lifting power with the greatest compression strength with a fast recoil. After 3 years of testing, these blanks were designed to produce what we believe are the most powerful blanks on the market today.

Everyone who's seen these new blanks from Seeker has commented on their superior action and appreciates their look—we combined the classic look with the new state-of-the-art material and resin system with a modern brown and tangerine tint finish.

All Seeker rods are available. Call us for a price.

DEFINITION OF MODULUS

Modulus is a measurement of the stiffness of the fibers when describing graphite. The higher the modulus number, the stiffer and more sensitive the rod. A modulus of 10-15 million is typical, 33-42 million indicates a medium range and is sometimes referred to as IM6. Very sensitive rods can go as high as 50+ million.

COMPOSITE GRAPHITE/"E" SALTWATER ROD BLANKS

A composite of E-Glass fiberglass and uni-directional 30 million modulus graphite make these the newest and lightest saltwater blanks available. SEEKER™ has done extensive research on mandrel and pattern design to offer the ultimate in a composite blank.

SEEKER'S™ resin system, E-glass and graphite are combined so that there are alternation layers in both materials in the butt section on the blank. SEEKER'S™ unique use of E-Glass provides unequalled durability and strength throughout the length of the blank while the unidirectional graphite adds stiffness for hook setting and fish fighting power at a 30% to 40% weight savings in the blank!

Available in a honey gold color that transitions to natural graphite charcoal color in the butt. Also available in jet black E-Glass that transitions to natural graphite charcoal color in the butt.

All blanks are one piece unless otherwise noted.

COMPOSITE GRAPHITE SALTWATER BLANKS

IGFA TROLLING ROD BLANKS

Available in black or white paint finish, a heavy duty trolling rod blank for the finest custom trolling rods. Designed especially for East Coast, Gulf Coast, Hawaii and Australia. Designed for standard AFTCO Uni-butt ferrules. Up to 6" of the blank butt may be trimmed off without affecting the butt diameter. The blanks are smoothly polished and finished with several coats of white or black epoxy paint for an impeccable finish.

IGFA TROLLING ROD BLANKS - *Specify (B) Black or (W) White. Please specify when ordering.*

FIBERGLASS "E" GLASS/BORON FRESHWATER LIGHT SALTWATER ROD BLANKS

A versatile line of freshwater and light saltwater blanks. These blanks feature special thin-wall designs and a high density lamination process that reduces weight and increases performance. Two-piece models feature our TRANSFLEX™ ferrule, that produces smooth power-transition between the tip and butt sections of the blank. This gives our two-piece blanks the strength and feel of a one piece rod.

FIBERGLASS FRESHWATER LIGHT/ SALTWATER BLANKS

Color: Black. Blanks are one piece, unless specified.

Sleeve Butts
&
Wood Butts
are located
in the index.

Note: Special order blanks can be drop shipped the same day.

Most blanks are stocked, some have to be special ordered.

Blanks

SCV

St. Croix's new high-modulus/high-strain graphite is the ultimate in high performance, and delivers greater strength without sacrificing fishing performance. Results in fast, quick-loading rods that cast with unbelievable ease and accuracy. Combined with our new 100% carbon-matte scrim to create blanks with weights up to 20% lighter than competitive models.

SCIV

An extraordinary high-performance, high-modulus graphite. Produces extremely lightweight rods with crisp, fast actions and an incredible transfer of power. Also very sensitive.

SCIII

An advanced high-modulus graphite that delivers maximum durability and sensitivity. Not as fast as SCIV, but creates rods with a smooth, light feel in the hand. Superb power.

SCII

Powerful, durable graphite. Very light and sensitive. Great performance vs. cost.

SCIIW

St. Croix's newest, advanced graphite material. They took their reliable standard modulus SCII graphite and created a new woven layout. The result is a blank with superior hoop strength and incredibly high impact-resistance. Used exclusively in their new Premier Saltwater offshore rods.

SCI

St. Croix's own specialized linear fiberglass matrix. Stronger, lighter and higher in modulus than ordinary fiberglass. Produces a softer action than graphite that is ideal for trolling and fishing fast-reaction baits such as crank baits and spinner baits.

E-GLASS

Traditional, premium-quality fiberglass with our custom resin system. Very durable and dependable. Designed for rugged saltwater use.

Mid Modullus (36ml) unidirectional graphite materials provides a highly functional general purpose Graphite Blank. Maximum strength and sensitivity through state-of-the-art technology at a reasonable cost.

Ice Fishing Blanks

GLASS ICE ROD BLANKS

Designed for strength and sensitivity, these solid fiberglass blanks have a straight taper. Painted blanks are black with international orange tip. Unpainted blanks are opaque white in color. Trim the tip and/or the butt to get the desired length and action.

**XMG GRAPHITE**

Lamiglas' newest high modulus, high tensile strength graphite.

This high modulus, high tensile strength graphite allows us to make smaller diameter blanks with faster action. XMG50 utilizes a blend of high modulus carbon fibers to create a perfectly balanced, lightweight blank that is more sensitive than anything on the market today. We use this new material in our XMG50 Fly rods and Salmon/Steelhead series. Also XMG Magnum Action Spin/Cast, Spin & Jig and Popping rod blanks.

IM700 PRO GRAPHITE

Remarkably Lighter and Stronger

Our broadest selection of rod blanks. They employ an all-new smaller-diameter blank design with an improved resin system to produce a 15 percent lighter weight rod than comparable graphites on the market. These rod blanks exhibit properties found only in second and third generation graphites. Superior performance at a great price!

G1000 GRAPHITE

Traditional, Classic-Style Action

This is our most distinguished series of rod blanks. We use first generation graphite coupled with an improved resin formula to reduce overall rod blank weight while maintaining "classic" moderately fast actions. This series spans a broad range of actions, line ratings and specialty models to cover most fishing applications.

FIBERGLASS

E-Glass Earned Its Place In History

This material is structurally the most durable of the fiberglass family. E-Glass is available in both L rod (light) and H rod (heavy) varieties. The glass properties are expressly matched to each unique application - such as cranking rod blanks for bass; mooching and downrigger rod blanks for salmon, shark, tuna, stripers and king mackerel. We use the same epoxy resins and composites material technology in these rod blanks as we do in our graphite models to offer you lighter weight and improved sensitivity over other manufacturers' fiberglass rod blanks.

"TRI-FLEX"

Exclusive Graphite/Fiberglass Composite

Features our proprietary Tri-wall construction. Unequaled, high quality E-Glass rod blanks are externally and internally reinforced through the butt and mid portion of the blank with graphite to reduce overall weight by 30-50% depending on the model. The tips are lightening fast and softer so they cast live bait as well as throw heavy iron, while the graphite reinforced portion of the rod blank gives tremendous fish fighting control and lifting power.

S-GLASS/GRAPHITE COMPOSITE

Classic Design Offshore Fly Blanks

A low modulus graphite core is covered by an outer layer of caramel colored S-Glass to create a blank that is incredibly strong and powerful yet still has the ability to cast larger saltwater patterns. Currently available are 4 pc. spigot ferruled fly blanks in 8-15 weights.

"Simulated" S-Glass is an amazingly sophisticated type of fiberglass that approaches graphite in lightness of weight and sensitivity at about half the cost of graphite. It has 25% higher modulus than regular fiberglass which gives it faster recovery with lighter rod weight. S-Glass Blanks are one of the finest values in blanks today; lightweight, sensitive, economical. An excellent blank for building a fine fishing instrument when you want more than standard fiberglass.

ENGLISH SURF

Great Britain, which has no space program, must channel all her frustration into surf casting. Over there baits are big, the fish lie far from shore, and English surf casters continue to dominate distance casting. Featuring level butt sections, zoned action tips and machined graphite spigot ferrules, the Cono-flex assortment ranges from conventional style surf cannons built for casts up to 600 feet—to sleek spin sticks that feel perfect for winging 3oz. ballistics.

JAPANESE VERTICAL JIGGING BLANKS

The hottest rage in Japan are these jigging blanks. Match the weight of the jig you are using to the blank.

"FIXER JAPAN" SPECIAL BLANKS FOR VERTICAL JIGGING (GRAPHITE/GLASS COMPOSITE)

No.	Length	Line	Jig Weight	Piece	Color	Action	Price
FXJ62	6'2"	40 lb	Max 7 oz.	1	Matte Black	Fast	\$136.77
FXJ60	6'0"	60 lb	Max 13 oz.	1	Matte Black	Fast	144.40

"FEEDER JAPAN" SPECIAL BLANKS FOR VERTICAL JIGGING (PURE GRAPHITE)

No.	Length	Line	Jig Weight	Piece	Color	Action	Price
FDJ592F	5'9"	20 lb	Max 2 oz.	1*	Clear	Fast	\$116.40
FDJ593F	5'9"	25 lb	Max 3 oz.	1*	Clear	Fast	121.49
FDJ594F	5'9"	30 lb	Max 4 oz.	1*	Clear	Fast	126.58
FDJ595F	5'9"	40 lb	Max 5 oz.	1*	Clear	Fast	136.77

* These blanks are designed to be used with a handle extension allowing you to remove the handle easily.

"FLICKER JAPAN" SLOW ACTION SPECIAL BLANKS FOR VERTICAL JIGGING (PURE GRAPHITE)

These slow action blanks are used in a special way. The jig weight is heavier than what would normally be used for the line weight.

Flicker Blanks are specially designed for what is called a "Long Jig" in Japan. Long Jigs are very slim shaped but very long in length.

This jigging style is now very new and popular in Japan.

No.	Length	Line	Jig Weight	Piece	Color	Action	Price
FLJ545S	5'4"	25 lb	Max 5 oz.	1*	Clear	Slow	\$131.67
FLJ547S	5'4"	30 lb	Max 7 oz.	1*	Clear	Slow	137.67
FLJ549S	5'4"	35 lb	Max 9 oz.	1*	Clear	Slow	141.86
FLJ5411S	5'4"	40 lb	Max 11 oz.	1*	Clear	Slow	146.94

* These blanks are designed to be used with a handle extension allowing you to remove the handle easily.

Directly From Japan!
