VISUAL WEAVE

VisualWEAVE is new Weave Design Software for Custom Rod Builders. It is designed to make the job of creating grid patterns and Left Lists for weaving as simple as possible.

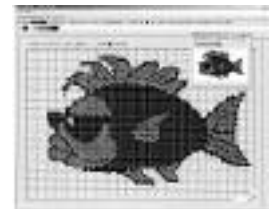

The software allows you to easily:

- Load an image file, Create a grid pattern, and Create a Left List
- VisualWEAVE is from David Boyle, author of the VisualWRAP Cross Wrap Design Software. It draws on the author's extensive experience in writing and supporting software written specifically for Custom Rod Builders, and incorporates ideas and suggestions drawn from many of the leading practitioners of the art of weaving.
- **System Requirements:** Windows XP or Vista
- Import image files from photos, scans etc (bmp, jpg, etc) or start with a blank grid.
- Automatically create a grid pattern from an imported image.
- Choice of 'Simple' or 'Advanced' sizing modes. Simple sizing allows you to specify the number of rows & columns. Advanced sizing takes into account the size of the rod, thread sizes and desired finished pattern size to suggest a resulting grid size.
- Auto color-matching. The software chooses the closest available thread

colours to match the colors in the original image.

- Palette-limiting. This allows you to select which thread colors the software can use in the grid pattern.
- Preloaded with typical thread colours from known manufacturers.
- Grid editing tools for easy manipulation of the grid image (freehand paint, outline, block fill, erase, swap, undo).
- Ability to underlay the original image beneath the grid for comparison or pattern tracing.
- Print to any scale.
- Ability to print nicknames along with colors.
- Advanced printing options allow you to change the shape of the printed grid cell, making it easier to weave directly from the printed grid. Traditional software only lets you print rectangular grid cells.
- Advanced layer handling, allowing you to specify which threads appear on which layers.
- Automatic Left List creation.
- Save projects for loading and/or editing at a later time.
- Help files

VISUAL WRAP

VisualWRAP is a unique software package for fishing rod builders. It lets you design decorative cross wraps for custom fishing rods, view them in 3D, and calculate layout spacings for your blank.

VisualWRAP is a software tool for working with decorative cross wraps. It lets you design, edit, view and share cross wrap thread patterns.

Cross wrap patterns are built up by laying colored threads onto a rod in a certain sequence. Patterns in VisualWRAP are based on a similar principle - using a scripting language you tell the software where to place threads and in what order. The software then draws threads on the screen, showing how the pattern will develop.

The pattern is drawn in 2D and can then be sent to a 3D viewer. This lets you see the pattern from any angle in space.

You can print out the 2D pattern scaled to the size of your blank. This is useful for laying out patterns, but also for showing how the pattern is going to look on your rod. You can print out a table showing the layout spacings to suit a tapered rod, or take measurements from the printed image.

A special recipe page draws the pattern at critical stages of its development, so you can see how it should be looking. You print the recipe and use it as a guide while you do the wrap.

Available sizes: 19/64" - 28/64" in all styles - *please specify size when ordering.*

KNURLED - The narrow, knurled check is the most popular genre of nickel silver winding checks in the world. Our twist? This check, like its un-knurled counterpart below, is essentially a slice out of the stepped portion of the geometry of our Broad Winding Check. **ARCWCK(size) \$8.72**

PLAIN - These checks are the ultimate in a subtle transition—understated elegance. You're making rods because you can make them better, so for goodness sake avoid those hideous molded rubber winding checks and put a little nickel silver on your next custom rod. **ARCWCP(size) \$8.28**

BROAD - Crafted from solid nickel silver bar stock in a style reminiscent of traditional "tapers" which transitioned from the large diameter of the grip to the smaller diameter of the rod blank. Perfect for engraving! **ARCWCB(size) \$10.67**

TIERED - Tiered, externally tapered winding checks with a delicate knurl on the upper tier have their historical basis in one of the classic rod shops that erupted from the Leonard-Kosmic tradition: Fred Thomas's shop. It's one of our favorite historic designs! **ARCWCT(size) \$9.70**

SWOOP - The swoop check is another original design that stemmed from the desire for an exceptionally narrow check that would still cap off a finely tapered reverse half wells grip with distinction. **ARCWCS(size) \$8.72**

RETRO WOOD HOSELS

You can count on Merrick Tackle to find for you the most unique and innovative ideas for all your custom rod projects. We are happy to reintroduce you to a great idea. Work your butt wrap right up over the wood hosel to produce a smooth, unequaled presentation!

Wood hosel winding checks are tapered for wrapping.

Sold Unfinished: **W** - Dark Walnut; **O** - Oak

Please specify wood type when ordering.

PERFECTION SWIVEL GIMBAL

The swivel ball gimbal is the ultimate accessory for saltwater fly rods and those utilizing heavier fly tackle. This gimbal rotates a full 360 degrees, thus allowing the angler the ability to rotate the rod from side to side for control, and also for applying the maximum amount of pressure on the rod spline without jeopardizing breakage due to twisting the rod off-spline.

WINDING CHECKS

Model ACK aluminum winding checks feature attractive outer knurling and are available in TiCH, Titanium, or Black anodizing. Model CCK brass winding checks feature a smooth bright finish and are available in a TiCH coating. Both styles offer a handsome alternative to the standard rubber/vinyl winding checks. Designate style choice from chart.

Cut & shape yourself.

CUSTOM HARDWOOD GRIPS

Cork or foam encasing the handle of your rod can have a dampening effect that diminishes sensitivity and the "feel" of a strike. A custom hardwood handle results in highly magnified telegraphic properties. Combined with proper spacing, the wood handle also contributes to better power transfer that permits longer, easier and more accurate casting. A custom hardwood grip will add a striking touch to your custom rod. All custom grips come with a reel seat, satin finish and a thumb groove. You must supply us with your color choice and the blank butt diameter.

SPECIAL ORDER - Please allow approximately 2 weeks for delivery.

FLY GRIPS

No.	Type	Handle Length	Price
ULRFLY6	FLY	6"	\$85.00
ULRFLY612	FLY	6 1/2"	85.00
ULRFLY7	FLY	7"	85.00

Please specify desired wood for Fly Grip:

(CM) Curly Maple, (P) Paduka, (B) Bocote

SPIN GRIPS

Spin grips come with a 4 1/2" Foregrip. The last half inch, of both the handle and foregrip, is turned down to insure a perfect, custom fit. This will make the handle assembly look smaller.

No.	Type	Rod Size	Handle Length	Price
ULRSPIN5	SPIN	5"	10"	\$65.00
ULRSPIN512	SPIN	5 1/2"	11"	70.00

QUICKGRIP™

These pictures are samples of what you can do with the Quickgrip material. Quickgrip shrinks 50% of its original size with the use of a heat gun or propane torch. Tough Neoprene. No gluing necessary. Smooth finish. Customize for unique grips.

CONTOURED QUICKGRIP™

This comfortable, anatomical grip shape was fashioned by first gluing a length of EVA foam grip material in place. The foam was shaped to fit the finger contour of an angler's hand and 1.25 inch ID Quickgrip was installed over the foam.

SPIRAL QUICKGRIP™

This very simple textured effect is accomplished by spiraling ordinary twine on the rod blank before the Quick grip is installed. All that you have to do is make your spiral wrap with the twine and hold the tag ends down with masking tape. It is recommended that you give the twine a light coat of rod builder's epoxy just to hold everything in place when you install the Quick grip. After the glue has dried, shrink the Quickgrip to fit.

DIAMOND QUICKGRIP™

In this example, diamond wrap 50# monofilament line along the length of the handle, glue it in place, then shrink the Quickgrip to fit.

TEXTURED QUICKGRIP™

(no picture)

You'll need a rod lathe for this trick, but it adds texture to the Quickgrip surface that many surfcasters might appreciate. Simply mount the rod in the lathe and run a 2" wide strip of coarse sandpaper (50 grit or better) along the entire length or just along the hand-held portions. Quickgrip is tough enough to withstand a sanding without tearing or ripping.

Order No.	Diameter	Per foot
QG34	3/4"	\$2.56
QG1	1"	3.30

Sold by the running foot.

WITH QUICKGRIP™ YOU CONTROL THE SHAPE!

UNIQUE HANDLE / GRIP MATERIAL

Quick Grip is a seamless synthetic material designed to take the place of cork tape grips. It offers resistance from damage to salt water, ultra violet rays and some acids.

The new grip material is made as a seamless sleeve and is available in a variety of inside diameters to fit over most handles and reel seats. It can be put on over guides or slipped on from the back to install it as a foregrip. Quick Grip has a smooth finish and helps to reduce sticking to the rod holder when trolling.

When heated, Quick Grip shrinks to less than half its original inside diameter. While the thickness of the material increases proportionally, the length is unchanged. A heat gun or low flame propane torch can be used to apply the heat.

The sleeve provides a toughened skin that is stronger than most cork tape and stays tighter on the handle for a longer period of time. It can also be used over synthetic grip materials such as EVA and Hypalon.

Custom Wood Handle Kits

Give your custom rod a unique look with these 2 and 3 piece kits.

- Light weight, and beautifully contoured designs.
- Each handle is done by hand, to ensure fine quality and craftsmanship
- Each handle is made one by one, never done by a duplicator!
- All handles are sealed with an epoxy which preserves the wood.
- Special sizes, exotic woods or inlays available by special order.

FLY ROD HANDLE SET

- With spacer for seat.
 - Available with hole IDs of 5/16", 1/2" or 3/8".
 - 2 piece set.
 - Fits 16mm seats such as UL3 (not included)
- Specify type of wood from the chart.

No	I.D. (in.)	Price
DFFLY14-	5/16	\$16.50

Emperor's Choice Handle Kits

Japanese Quality & Technology

Emperor's choice handle kits are made from the finest components available. Each kit features a custom hand painted Fuji reel seat, colored aluminum trim rings and colored aluminum butt caps along with quality cork or EVA. Some of the kits contain Kevlar carbon pipe. Pipe hole measures .500. Glue blank inside.

GKEECSKD1

Features a custom painted Fuji ECS style reel seat in Sea Blue, red winding checks, Kevlar carbon pipe, shaped EVA, and finished with a silver aluminum butt cap. Approximately 15" Long.

No.	Price
GKEECSKD1	\$151.44

GKEECSKD1C

Overall length is 15". Built on Kevlar carbon pipe, this kit has a custom painted Fuji seat with an Andromeda finish. Accented with gold hoods, gold aluminum butt end, gold winding checks and accent rings. The butt cap sits on a larger diameter piece of Kevlar carbon pipe for a very unique touch.

No.	Price
GKEECSKD1C	\$172.32

GKECSCSP2

Approximately 15 3/4" long. This handle kit features a Fuji ECS style seat painted with a real marble finish. Built on a Kevlar carbon pipe it has blue accent rings, matching blue aluminum winding checks, contoured cork grips and a gold aluminum butt cap.

No.	Price
GKECSCSP2	\$157.04

GKECSESP4

Approximately 15" long, this handle kit has purple accent rings and winding checks, a gold aluminum butt cap, shaped EVA grips, and a custom painted Fuji ECS style seat in gun metal. The handle is constructed on Kevlar pipe.

No.	Price
GKECSESP4	\$135.67

GKCECSKDX

Overall length is approximately 12 1/4". Built on Kevlar woven graphite tubing, this handle is designed around a Wood Brown Marble custom painted Fuji reel seat. The seat has a gold hood to match the gold aluminum butt cap. Accent rings and winding checks are purple.

No.	Price
GKCECSKDX	\$149.89

GKEIPSKD1

Approximately 10 1/2". Centered around a Matte Candy Red, custom painted Fuji IPS reel seat, this handle has nicely shaped EVA foam grips. Gold winding checks, silver aluminum butt cap and seat hood, all built on Kevlar woven graphite tubing for a very dramatic effect.

No.	Price
GKEIPSKD1	\$136.94

GKCIPSKD1

Approximately 10 1/4". Very neat handle built on Kevlar woven carbon tubing. Cork is shaped to fit the hand painted IPS style seat. The Fuji seat is Mazzorati color with a gold hood. The handle is finished off with a gold aluminum butt cap and silver winding checks for a very flashy effect.

No.	Price
GKCIPSKD1	\$159.33

GKEIPSF3

Approximately 11" long. This handle kit is built around a metallic silver, custom painted, IPS style (size 16) reel seat. Beautifully shaped EVA conforms to the shape of the seat. Trimmed with a gold butt cap and gold hood. Light and very sharp looking.

No.	Price
GKEIPSF3	\$82.21

GKIPSC5

Approximately 13 1/4". This handle is built around a sea green, custom painted, gold hooded IPS style seat. The high quality cork is shaped to fit the seat and contoured to fit the hand. Finished off with a gold aluminum butt cap, this handle will make a very impressive rod.

No.	Price
GKIPSC5	\$109.70

GKEIPSKRV

Approximately 10 1/2". The matte black, custom painted Fuji IPS seat has a gold hood to match the gold, aluminum butt cap. EVA is shaped to fit the seat and the angler's hand. Red aluminum winding checks finish off this handle which has been built on Kevlar carbon pipe.

No.	Price
GKEIPSKRV	\$121.16

COLORED EVA BLOCKS AND STRIPS

COLOR EVA BLOCKS

Tailor these blocks to create truly unique custom grips and butt caps. The block material easily lends itself to be shaped by turning and reaming. Trim off the edges with a cutting tool and then sand to your finished shape. You will find this as easy to work with as cork. To create difficult inlays, work in block form and then finish to desired shape.

ENCAPSULATED GRIPS

A full color hat pin is custom set into either a wood grain or marble background and then completely encased in a clear, durable epoxy. Many fish and wildlife designs can be ordered. See our pewter fish inlay/hat pins for just some of the most popular design choices available. The grip can be enlarged by reaming if necessary. You must specify the fish and background when ordering.

TEXALUM TUBE HANDLE*

Texalium is a 2X2 twill woven material with Aluminum powder coating on one side designed by Hexcel. It provides excellent hoop strength so it resists crushing. These tubes will be available in the same sizes as the current graphite woven tubes. Reel seat sold separately.

No.	I.D. (in.)	Length	Price
TXT874-60	.874	60"	\$48.84
TXT980-60	.980	60"	58.14

* Fiberglass with aluminum coating

Color Chart

- BL = Blue
- GR = Green
- BU = Burgundy/Red
- BRN = Brown
- CCS = Clear Coat

WOVEN GRAPHITE SENSOR TUBING

Made with woven graphite material, stronger, lighter, and more sensitive.

When the handle is on the blank with graphite arbors it becomes part of the blank transmitting the full vibration to your hand. See color chart.

No.	Description	I.D.	Price
THT874-60*	60" long	.874"	\$80.23
THT980-60*	60" long	.980"	101.16
GA24	Graphite arbor (fits .874" tube)		.71
GA26	Graphite arbor (fits .980" tube)		.88
LCM1	Cork mushroom caps (fits .874" tube)		1.40
LCM2	Cork mushroom caps (fits .900" tube)		1.40

15MM size

WOVEN GRAPHITE SENSOR TUBING

Composed of a lightweight, high grade, woven material, this tubing is very suitable for extending blanks, yet retaining sensitivity. The diameter is designed to be a perfect fit for 15mm reel seats. Construct either your spinning or casting handle on the tube and then attach it to your blank. Exposed in the mid-section of a split grip system, for example, it will enable extreme sensitivity. This material is very adaptable for many handle assemblies.

No.	Size	I.D.	O.D.	Price
GHT500*	60" Piece	1/2"	15mm	\$28.64

*seat sold separately

Color:
CCG = Clear Coat Graphite

CHINESE HANDCUFFS - MULTI COLORED METALLIC PRE-MADE BUTT WRAPS

Comes wrapped over a rope core, simply pull out the rope then slide the wrap over the blank, smooth with your fingers. One size fits most size blanks. Simply finish off with trimbands and epoxy and you have a fancy butt wrap in less than 2 minutes!

No.	Color	Price per 36"

NSA20	Solid Arbor for all Fuji size 20 Reel Seats	.55

4" ARBORS

Solid, semi-porous polyurethane foam shims for mounting a reel seat securely. These are machined, not molded and are open celled to absorb the glue well. They can be easily reamed or drilled to fit your rod blank. Increases sensitivity. Comparable in both size, weight and texture to the popular smaller graphite arbors. 3 per pack

ALL CORK IS NOT CREATED EQUAL.

As an organic product, cork is graded on a visual basis. The best has few blemishes in the form of pitting, and is more solid throughout. Lower graded cork has more "pin holes" and is less dense.

CORK PLUGS FOR JIG PATTERNS

100 pieces per bag

No.	Color	Price
PLUG-NAT	Natural	\$5.00
PLUG-GRN	Green	7.00
PLUG-RED	Red	7.00

Note: Some cork is bleached, some is not.

Cork rings are available in different grades or quality levels. Cork is graded based on its density and the absence or presence of pits.

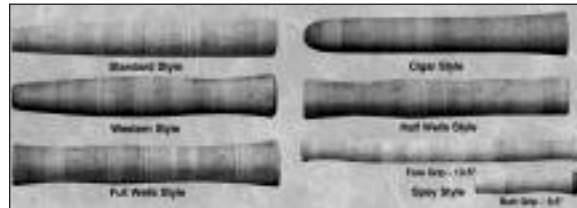

CORK GRIPS

REC Uses only the highest cork grades commercially available and imports directly from Portugal. All cork grips are individually machine fumed to shape, hand fumed to a smooth finish, rifled, re-sanded and pre-bored to 0.250". Note that grips for uplocking reel seats use different diameter milled end corks. Please indicate reel seat to be used with grip(s). Made from REC's "Super Grade" Cork. Please specify size (length).

16-INCH PILOT DRILL BIT

Custom cut for enlarging the I.D. of Cork and Eva Foam Grips.

The Cork Pilot Bit is used for a quick and precise enlargement of the I.D. hole in pre-shaped grips. These bits can be used in Cork and Foam grip material, they are 16 inches in length, and available in three hole sizes: 1/2", 5/8", & 3/4". All bits come with a 1/4" pilot. The pilot can be enlarged with the 3/8" sleeve adapter (included) or masking tape. Any of these bits can be resized by using a grinder or belt sander to trim the cutting edges of the bit. Be careful to maintain the cutting angle and take the same amount off of each edge.

No.	Description	Price
CPB1/2	Cork Pilot Bit 1/2"	\$19.80
CPB5/8	Cork Pilot Bit 5/8"	19.80

LG4	Leather Strip - Black	48"	1"	\$17.42

Sharkskin™

The newest, in seamless, synthetic grip material, Sharkskin™ is designed to be a super tough, seamless, waterproof skin that is stronger than cork tape. It comes with a factory-applied sealant which is a heat-activated, thermoplastic material that remains soft and flexible over long periods under adverse environmental conditions. During heating the sealant softens and bonds to underlying surfaces.

A similar concept to our popular Quick Grip™, Sharkskin™ differs in that it is thicker and has glue. Like Quick Grip™ it can be put on over guides or slipped on from the back to install it as a foregrip. The smooth surface will help to reduce sticking to the rod holder when trolling. This new material is sold in 4 ft lengths: the shrink ratio is 3:1.

Item#	O.D.	Wall I.D.	Price per Length
SHARK1	1 1/2"	.17	\$28.20
SHARK2	1 1/8"	.12	20.71

HEAT GUN

Used for Quick Grip™, shrink tube, etc. A great value! Complete kit for slow heating. Two temperature settings – 630° F and 1,000° F. Sold complete in kit form with heat gun, putty knife, one wood handle, three scrapers, four heat gun nozzles and case.

ACW TITANIUM PERFECT-FIT FERRULE

The ACW Titanium Perfect-Fit Ferrule is the post-modern solution to the age-old conundrum: Where do I find a ferrule that is ultralight, corrosion-resistant, impeccably styled, and...pre-fit? Yes. We mean that these ferrules are delivered to you with no lapping required. The fit is snug; the pop is professional. After intensive research, our engineering team selected medical grade ELI titanium.

Extra Low Interstitial titanium is renowned for its lower oxygen content which provides for better elongation. In turn, better elongation means superior flexibility and durability, assets that can be appreciated in products ranging from bone screws to ferrules. Titanium boasts a strength-to-weight ratio of 4.17 times that of nickel silver. ACW Titanium Perfect-Fit Ferrules require 50% less mass than comparable nickel silver ferrules, only 0.165 oz. per whole-set.

Available in size 13/64".

No.	Description	Price
ARCTPF13WS	Whole Set	\$89.99
ARCTPF13HS	Half Set	75.58

ARCANE NS FERRULE PLUGS

A top-notch topknot for your ferrule! The plug is easily lapped to size. It serves to protect the female ferrule from intruding grit, which can wreck your ferrule's fit.

Fits super-Z style ferrules sizes 11/64" - 15/64".

No.	Size	Price
ARCFP11	11/64"	\$14.63
ARCFP12	12/64"	14.63

ARCFP14	14/64"	14.63
ARCFP15	15/64"	14.63

ACW NICKEL SILVER FERRULE

Our nickel silver ferrules are machined from solid 12% nickel silver bar stock. These ferrules feature simple, traditional good looks in the ever popular Swiss-style. The females have a simple welt and the males have a single, decorative groove machined in the center of the shoulder. Our ferrules have won popular approval because they combine exceptional affordability with the highest quality machining. Due to the high volume of production and innovative machining techniques, we can offer these ferrules at prices far less than tube-stock ferrules. What's better than a beautiful, superbly-functional product that costs less? Only ice cream. And maybe not even that.

Available in sizes 10/64" - 16/64".
