HT® FLAT BRAID METALLIC

An innovative, flat metallic braid specifically developed for the custom rod builder. Super strength-Tensil of 6.5 lbs. Eliminates the timely task of single thread designs. Can be used as a guide wrap as well as a decorative butt wrap. Maintains its brilliance regardless of chemicals used. Not degraded by finishes, epoxys or color preservers. Consistently maintains its form to provide a high quality, uniform wrap design, saving time while maintaining brilliance. 1/8" wide x 0.0008 thick.

NCP THREAD

N.C.P Nylon is a specially constructed thread that requires no color preserver, yet has all the strength and wearing features of other popular Gudebrod threads. It is the perfect thread for major rod manufacturers as well as professional and custom rod wrappers. The color pigment in N.C.P is preconditioned into a colorfast medium that resists the damaging affects of powerful epoxies and varnishes that break down the color pigment in regular nylon thread. This saves the time consuming steps of applying several coats of color preserver. Rod finish may be applied directly over rod wrappings. Available in assorted yardage & 4oz. spools. AVAILABLE IN SIZES: A,C,D

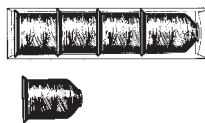

N.C.P. PRO SPOOL

Nylon Thread

Stronger by weight than steel wire! Of all styles of thread manufactured by Gudebrod, our Nylon wrapping thread is the strongest and has the brightest color. Pressure dyed with high quality, color fast dye material. This thread is the best choice for wrapping guides, decorative diamond wraps on rod butts, or wrapping jigs and tying bucktails.

NEPTUNE THREAD TENSION DEVICE

The Neptune Thread tensioner has no springs or parallel discs to put pressure on the thread. Nor is the pressure put directly on the spool itself. The pressure is applied (without springs, screws or weights) to the rotating axis and this is what creates the thread tension. This tension is adjustable, with approximately 4-oz. maximum. The entire assembly of the thread spool, axle, and wing nut rotates around the base unit. The neptune thread Tensioner shown here has a small thread spool mounted on it, but it also will handle large thread spools. This state-of-the-art thread tension device is superior in performance compared to what is currently available. This device will not abrade, tear, or cause fuzzies on the foil on metallic thread. The device as shown, can be mounted in any position by means of the screw at the base of the device.

RodSmith Thread

Pacific Bay is proud to add the RodSmith Rod Wrapping Thread in three varieties to it's product line.

- Because it's from Pacific Bay, you can be rest assured that these threads are made to exacting standards of consistency and are without a doubt the finest quality and the highest performing.
- All sizes and colors contain NO SILICONES, waxes or lubricants which makes them very easy to cover with clear epoxy coatings without interiors.
- The RodSmith Thread is available in Nylon, Stay True or Metallic and come in 100 yard spools.

RODSMITH NYLON THREAD

NYLON- 6/6 high tenacity continuous filament yarns have great strength, very little starch with luster and bright color. The thread is dyed using EPA approved acid dyestuffs for superior light resistance. These dyes are the same type used by the auto industry for interiors.

RODSMITH STAY TRUE™ THREAD

The Stay True thread requires no color preservative. Rod finish may be applied without any special preparation therefore saving time. Stay True has the same long-wearing features as Nylon while resisting the damaging effects of powerful epoxies and varnishes.

DOC SKI (DVD)

ADVANCED WEAVING TECHNIQUES
DVDAWT (DVD) \$22.00
3 hours of microscopic, in-depth instruction on the fine art of thread weaving with Doc Ski. Includes Free Pattern.

DVDCRB (DVD) CUSTOM ROD BUILDING \$22.00
3 hours of how-to-build your own custom rod from A to Z with the master, Doc Ski. Very informative.

ROGER SEIDERS (DVD)

No.	Price
DVD1 (DVD)	\$14.64

Roger Seiders, president of Flex Coat, takes you through the basic steps of rod building, shows you the tools you'll need, how to find the spine, align & wrap the guides, build the rod handle and mix & apply the finish. Also shown are Advanced tools and techniques we use. This video is a useful tool to use with Flex Coat Step by Step Rod Building and Start to Finish Fly Rod Building Books.

ROD BUILDING BASICS DVD

FREAP1 A complete how-to course on Rod Building, from butt cap to tip top. This DVD features new and exciting components, and state-of-the-art equipment. Filmed right inside his shop, professional rod builder Steve Petri will take you through the Rod Building experience one step at a time. Blank selection, proper spine placement, grips, guides, and wrapping, are discussed. Great for beginners, and for future reference. \$14.99

MADEIRA JEWEL THREAD

A hologram thread perfect for trim and decorative work. Thread reflects the lights around them to create a shimmering spectrum of multi-colored thread work. The color reflections are true hologram pinpoints laid in a continuous, random fashion on a micro-thin polyester film. This film is then slit into the finest filament. 100 meter snap spools.

HOLOGRAM ROD WINDING THREAD

This thread is engineered to create a dazzling effect of sparkling lights. By layering a hologram consisting of pinpoints of multicolor on microthin polyester film the eye beholds a vision similar to the play of light on water. Guaranteed to provoke that "WOW!" response by all who see it. For use on butt wraps, accents and trim bands, to weave in highlights or in any other situation you can think of 165 yards per spool.

PEARSALL'S GOSSAMER 6/0 - 45 meters per spool

Pearsall's Gossamer 6/0 is unlike any currently manufactured silk. Properly burnished and finished, silk this fine looks as though it has been poured into place. This is the finest diameter silk sold for wrapping rods, and Gossamer's twist is undoubtedly more consistent than any American silk, and probably more so than any Japanese silk. Consistent, but not too tight. Pair these attributes and you have

a silk thread that does not mottle when properly finished. Wraps of Gossamer will accept varnish evenly, giving your rods the professional appearance you desire.

METALLIC THREAD

Add some sparkle to your designs with Sliver™. Although it will give your designs the same flair as metallic thread, Sliver™ is different from "regular" metallics.

It's thin and flat. Sliver™ is a 3-ply thread, 50 micron thick with a width of 1/100". It has 2-outer plies of polyester film and a center strip of polyethylene film, laminated together to limit thread elongations and treated to look metallic. 250 yard spools. Available in 24 colors.

Fish Hawk Rod Winding Threads were developed specifically to provide trouble-free performance for the custom rod builder.

NYLON THREAD

Specifically engineered for the demands of rod building. It is also an excellent choice for lures, wrapping jigs and tying bucktails. Special high tenacity nylon assures unequalled strength, bright and consistent colors.

Prefix No.	Description	Price

METALLIC THREAD

Nylon core for maximum strength and windability. Rice paper is then applied for ultimate flexibility and bonding. The metalizing is silver alloy (not aluminum) so it won't tarnish or lose its luster and shine. It's finished with a polyester film which keeps it smooth, supple and fray resistant.
