

ROD BUILDING TOOLS

Mark Crouse was born in Union Town, Pennsylvania in the early 1960's. Before he was six years old, his family had lived in Missouri, New Mexico, California and North Carolina. In 1969, Mark moved with his mother to Munich, Germany. He started building fishing rods at the age of 12. What started as an accident has become a life-long profession for Mark. While living in Europe, he specialized in Long Rods that were used for Steelhead and Carp, as well as portable gaffs. He continued building rods in Europe until he returned to the United States in 1993.

Since thread art was a new application for rod building, Mark had to develop his own techniques and materials. Mark's work is known throughout the world. He was the only Western World participant in the 2001 Japanese Thread Art Festa. His work has even been documented by various authors and publications.

While developing his own techniques and methods for thread art, Mark developed tools specific to this application. Mark has finally decided to make these tools available to other crafters interested in improving their finished products.

MARK CROUSE ROD BUILDING TOOLS

No.	Description	Price
MCSMWRAP	Fly Rod Hand Wrapper with Tools	\$335.00
MCLGWRAP	Large Hand Wrapper	395.00
MCJIGA	Weaving Jig-Size A Thread	37.18
MCJIGD	Weaving Jig-Size D Thread	44.22
MCLAYOUT12	Layout Tool-12 Inch	28.14
MCLAYOUT15	Layout Tool-15 Inch	34.84
MCCORKSPLIT36	Split Grips 36 Inch Heavy-Cork Clamp	50.92
MCCORKLG	Large Rods 36 Inch Heavy-Cork Clamp	34.84
MCCORKFLY	Fly Rods Small Bore-Cork Clamp	20.10
MCCORKREG	Regular-Cork Clamp	28.14
MCCORKSPLIT24	Split Handle 24 Inch Reg-Cork Clamp	44.22
MCCORKNOBLANK	No Blank Required-Cork Clamp	18.76

The Split Grip Cork Clamp comes in two sizes:

36-inch for all longer rods. i.e. Surf, English Carp, Steelhead, etc.

24-inch for shorter rods.

Don't forget to slide on your Winding Checks before gluing the Handle!

LARGE HAND WRAPPER BENCH

The Large Hand Wrapper Bench is perfect for building any type of rod you desire. Your tools can be kept out of your immediate work area and still be within easy reach.

The spool holders can accommodate all brands of thread, including Gudebrod, Talbot, Holland, Fishhawk, and Madeira. The bench provides space for up to 12 working spools of thread. This should provide enough variety for even the most complicated designs.

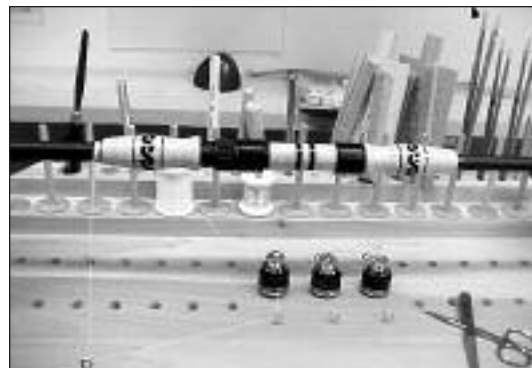

The unit also includes two bench-mounted supports and two free-standing supports.

LARGE HAND WRAPPER BENCH

The Hand Wrapper also includes several of the tools that I find most useful: an Exacto knife for cutting thread ends flush; a White China Marker for marking centers and guide spacing; a Large Needle Pick for flattening weaves; a Small Needle Pick for lifting threads, especially useful for crossed designs; a Burnishing Tool for eliminating spaces in the wraps; a pair of scissors for general use; a pair of tweezers for pulling the thread ends to assist with a "flush" cut; a Spatula for mixing and spreading glue; a Thread Gauge for measuring trim bands; brushes for applying finish coat and color preserver; and wood sticks for mixing epoxy.

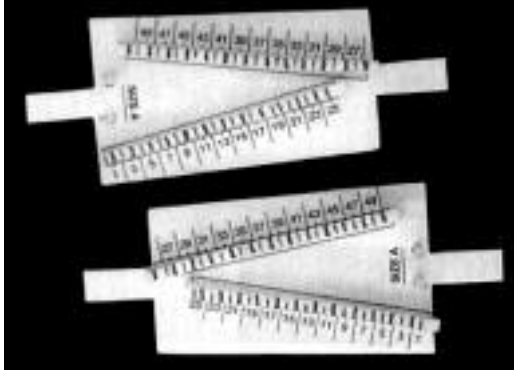

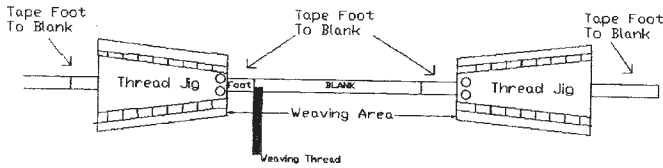

Weaving jigs are not included; however every bench includes a bore for them.

KEL'S THREAD WEAVING JIG

Includes 2 jigs: 1 for Size A thread and 1 for Size D thread.

No.	Price
KELJIG	\$46.90

DOC SKI WEAVING JIGS

We also stock the Doc Ski videos!

No.	Description	Price
DOC50	50 Thread	\$38.86
DOC100	100 Thread	58.96

WONDER WEAVER TWO WHEEL VERSION

This version of the Wonder Weaver is designed to be used where it is not convenient to use the left side tube of the regular three wheel model. The large bore wheel has been coupled with the regular right side wheel to give a combination that will accommodate most pistol grip and trigger type reel seats as well as Fly Rods where there is no blank to the left of the reel seat. It can be used in place of the regular three wheel model but thread control on the left side is dependent upon location. We recommend mounting the left side as far left as practical when using Metallic threads to prevent long tails from tangling with one another.

No.	Price
RENWW0010	\$176.36

RENZETTI WONDER WEAVER

Allows you to perform any standard weave PLUS...

- Color changes weaves
- 360-degree weaves
- Multiple weaves at the same time!
- Positive thread holding
- Easy thread ID and Count
- Built to last a lifetime

No.	Price
RENWW0001	\$289.06

RENZETTI LARGE BORE WEAVING HEAD

This attachment for the Wonder Weaver allows for blanks with larger butt diameters.

No.	Price
RENWW0009	\$48.96

WEAVING PATTERNS

All patterns are laminated so that you can use them over and over without destroying the paper when erasing your check marks. All schematics are left list.

Price Each: \$17.25

PSIFIS230	Fl. Chartreuse	1.13
PSIFIS231	Fl. Pink	1.13

RINGNECK PHEASANT

No.	Color	Price
PSIFIS209	White	\$1.13
PSIFIS210	Toucan Yellow	1.13
PSIFIS211	Kingfisher Blue	1.13
PSIFIS212	Cock of the Rock	1.13
PSIFIS213	Indian Crow	1.13

TEAL BARRED FLANK

No.	Per Package	Price
PSIFIS204	12 Feathers	\$1.88

MALLARD BRONZE

No.	Per Package	Price
PSIFIS205	3 Pair	\$1.35

WOOD DUCK BLACK & WHITE

No.	Per Package	Price
PSIFIS200	3 Lefts, 3 Rights	\$3.00

WOOD DUCK LEMON BARRED

No.	Per Package	Price
PSIFIS201	12 Feathers	\$3.00

PRIME MIXED WATERFOWL

No.	Per Package	Price
PSIFIS202	Gadwall, Pintail & Teal	\$1.50

GOLDEN PHEASANT

No.	Description	Price
PSIFIS206	Small Tippets	\$.80
PSIFIS207	Medium Tippets	.80
PSIFIS208	Large Tippets	.80

VISUAL WEAVE

VisualWEAVE is new Weave Design Software for Custom Rod Builders. It is designed to make the job of creating grid patterns and Left Lists for weaving as simple as possible.

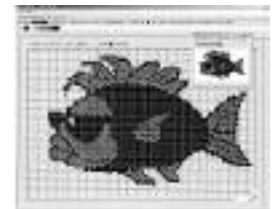

The software allows you to easily:

- Load an image file, Create a grid pattern, and Create a Left List
- VisualWEAVE is from David Boyle, author of the VisualWRAP Cross Wrap Design Software. It draws on the author's extensive experience in writing and supporting software written specifically for Custom Rod Builders, and incorporates ideas and suggestions drawn from many of the leading practitioners of the art of weaving.
- **System Requirements:** Windows XP or Vista
- Import image files from photos, scans etc (bmp, jpg, etc) or start with a blank grid.
- Automatically create a grid pattern from an imported image.
- Choice of 'Simple' or 'Advanced' sizing modes. Simple sizing allows you to specify the number of rows & columns. Advanced sizing takes into account the size of the rod, thread sizes and desired finished pattern size to suggest a resulting grid size.
- Auto color-matching. The software chooses the closest available thread

colours to match the colors in the original image.

- Palette-limiting. This allows you to select which thread colors the software can use in the grid pattern.
- Preloaded with typical thread colours from known manufacturers.
- Grid editing tools for easy manipulation of the grid image (freehand paint, outline, block fill, erase, swap, undo).
- Ability to underlay the original image beneath the grid for comparison or pattern tracing.
- Print to any scale.
- Ability to print nicknames along with colors.
- Advanced printing options allow you to change the shape of the printed grid cell, making it easier to weave directly from the printed grid. Traditional software only lets you print rectangular grid cells.
- Advanced layer handling, allowing you to specify which threads appear on which layers.
- Automatic Left List creation.
- Save projects for loading and/or editing at a later time.
- Help files

VISWEAVE	\$72.00

VISUAL WRAP

VisualWRAP is a unique software package for fishing rod builders. It lets you design decorative cross wraps for custom fishing rods, view them in 3D, and calculate layout spacings for your blank.

VisualWRAP is a software tool for working with decorative cross wraps. It lets you design, edit, view and share cross wrap thread patterns.

Cross wrap patterns are built up by laying colored threads onto a rod in a certain sequence. Patterns in VisualWRAP are based on a similar principle - using a scripting language you tell the software where to place threads and in what order. The software then draws threads on the screen, showing how the pattern will develop.

The pattern is drawn in 2D and can then be sent to a 3D viewer. This lets you see the pattern from any angle in space.

You can print out the 2D pattern scaled to the size of your blank. This is useful for laying out patterns, but also for showing how the pattern is going to look on your rod. You can print out a table showing the layout spacings to suit a tapered rod, or take measurements from the printed image.

A special recipe page draws the pattern at critical stages of its development, so you can see how it should be looking. You print the recipe and use it as a guide while you do the wrap.
