**FLEX COAT EPOXY FLY & JIG TURNER**

The use of 5-Minute epoxy and high build finish for making fly bodies, coating lures and jigs, and suspending iridescent crystals is a rapidly expanding practice in luremaking. The key to success with this technique is rotating the lures while they cure. The Flex Coat Epoxy Fly and Jig turner is equipped with a USA built, continuous duty 18 RPM motor and a handy on/off switch. Lures are securely held in place by inserting hook points into durable EVA foam. This system also includes a V-upright support, which enables it to double as a rod finishing motor.

**TIE TRAY**

The Streamside Tie Tray™ is a fly tying/organizer designed for tying flies at a fixed station, for travel tying, or organizing rod building supplies. It will hold most tying tools and materials for those tiers requiring a complete tying organizer. The Tie Tray™ design allows tying materials and tools to be staged conveniently close to the tying area without cluttering the immediate vise area. It can be used with both clamp-type and pedestal-type vises, and can fit into any travel case that can accommodate minimum measurements of 12" x 9W x 2-1/2". The Tie Tray™ is made of ABS plastic for high strength, lightness of weight, durability and chemical resistance. The ABS plastic also protects tying tools, and has a non-glare surface finish, which is easy on the eyes (perfect for fly tying). Several unique functions of the Tie Tray™ are the adjustable white ABS Plastic profile plate, the material clip, the dubbing holder, and the storage slots for dubbing bags. The Tie Tray™ is manufactured in the USA. Features:

- Twelve thread holders to store spooled tying materials
- Removable and adjustable 3' x 6" Profile Plate (can be painted any desired color)
- Stainless steel material clip conveniently located to hold all types of loose tying materials
- Two small trays to stage hooks, beads, eyes and other small loose tying material
- One large tray and one medium tray to stage larger hooks and other loose tying materials
- Bristle Tack strip to stage up to one dozen flies sizes #1 to #18
- Two neck hackle storage slots keep necks organized and within reach (can also hold hair patches or bagged tying materials)
- Four holes for quilled turkey, goose or pheasant feathers
- Two head cement storage areas to accommodate both square or round bottles
- One storage hole to hold a dubbing wax dispenser
- One storage hole to hold a dubbing twister
- One dubbing holder (To store dubbing, press and rub it into holder teeth. When dubbing is needed just pull dubbing out of holder)
- Three storage areas for three sizes of hair stackers
- Nine storage slots for bags of dubbing material (or other bagged tying materials)
- 22 holes of four sizes to store individual fly tying tools

**THE COMPLETE BOOK OF FLY TYING**

by Eric Leiser. Second Edition. With over 90,000 sold in its first edition, this is "a classic book from a highly respected tier" (Jay Cassell, Deputy Editor, Field & Stream). Here is a book for fly tiers, beginners and experts alike, that provides foolproof directions for tying all types of flies. Unlike specialized books that describe particular types or styles of flies, this book covers them all—both freshwater and saltwater flies. Dry flies for trout, streamers for tarpon, hair bugs for bass: you will find them here. Eric Leiser teaches the basic methods for tying standard dries, hair dries, parachute dries, hackleless flies, wets, nymphs, streamers, jassids and other terrestrials, and more. Whether you're a seasoned tier looking for specific advice, or you're brand new to the craft and just want the fundamentals, this book is a complete education.
