

COCKPIT HARPOON

Custom Harpoon, made in the USA. Harpoons are sold complete with stainless shaft, and one rigged dart! Great for landing tuna, swordfish, shark, dorado, wahoo, and other large gamefish! 8 ft. long. Black fiberglass handle.

No.	Price
87221001	\$161.06

FIBERGLASS GAFFS

Tapered fiberglass handles with custom seine-cord grip wrap with Turk's heads. Featuring 316 stainless hooks in 2" and 3" sizes, with 4', 6' and 8' handles.

No.	Handle	Hook	Price
AFG24	4'	2"	\$55.67
AFG26	6'	2"	65.68
AFG28	8'	2"	84.54
AFG34	4'	3"	56.73
AFG36	6'	3"	66.76
AFG38	8'	3"	84.54

TWO-PIECE TOURNAMENT GAFF

Also great for bridge, party boats and jettys.

This 12 foot, two piece gaff features a black anodized shaft that is divided into an 8 foot section with hook, and a 4 foot rear section, complete with two vinyl grips. Constructed of marine grade aluminum and is joined in the middle with a ferrule and collet nut characteristic of the AFTCO Unibutt. The ferrule and collet nut "joint" is extremely strong, lightweight and fully waterproof when assembled. Both the ferrule and nut are permanently attached to the forward section, and because the end of the ferrule accepts a vinyl butt cap, this longer 8-foot shaft can optionally be used as a stand-alone gaff.

No.	Price
3612HB	\$132.48

Custom Rigging Available

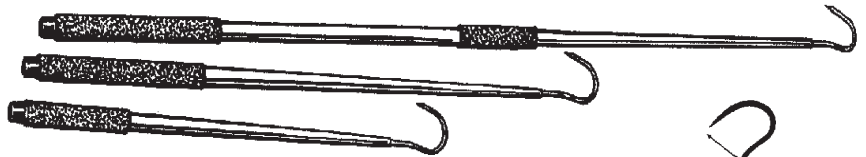

TAPER-TIP ALUMINUM GAFFS

Slim tapered shape makes these gaffs easy and fast to maneuver. Shafts are made from corrosion resistant marine aluminum anodized a rich gold (unless indicated with "B" for all black.)

Soft but rugged black grips and black vinyl butt caps.

Barbed triangular hook.

With Breakaway Hook for Gaffing Powerful Fish!

Plastic insert seals out water to prevent corrosion.

Line snaps to release the hook from the shaft.

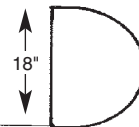

FISH TAILER

Provides safer, cleaner control of boated fish. Facilitates injury free tagging. Brings fish under control quickly for measuring. 4' long gold anodized taper tip aluminum shaft with 3/4" springy stainless steel aircraft cable, and a smaller plastic-coated cable that actually closes around the fish's tail. Lifts up to 100 lbs. Approximate 18" diameter loop.

For safer, cleaner, control of boated fish and injury free tagging.

BRONCO KITE ROD

42" Graphite composite blank kite rod with rear sleeve butt, aluminum gimbal and aluminum reel seat. Sic top.

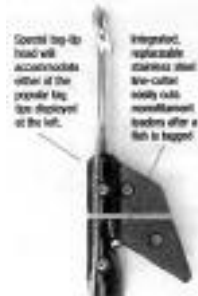

No.	Price
STIKTROD	\$34.95

TWO-PIECE TAG & RELEASE STICKS

The Aftco Tag and Release Stick features a special tag-tip head that allows either The Billfish Foundation or the National Marine Fisheries Service tag tips to be used. Also featured is an integrated, replaceable stainless steel line-cutter blade, designed for easily cutting monofilament leaders after a fish has been tagged. The tagging poles (both 6 and 8-foot models) are specially designed two-piece E-glass blanks, ferruled in the middle and custom-crafted to handle the stresses associated with tagging big game fish and cutting heavy leaders. Handles are deep brown in color, complemented by black nylon trim wraps with metallic blue-and-gold accents. Black seine cord wrappings with Turk's Heads (finished with epoxy for durability and tackiness) and a rubber butt cap completes each tag stick handle.

DACG24	\$16.50

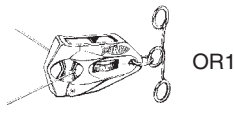

ROLLER-TROLLER OUTRIGGER & FLAT LINE CLIPS

Both models put trolled lines on a big, polished roller that turns right WITH the line. You stop "sawing" a few critical inches of line over a thin wire bail as your lures skip and jerk through the water. Easy adjustments for tension & lure distance.

No.	Description	Price
FL1	Aftco Flat Line Clip	\$18.68
OR1	Aftco Outrigger Clip (per pair)	37.35

MULTI-PURPOSE RELEASE CLIPS

The Ultimate bait clip. Super lightweight, composite clip is perfect for kites, downriggers, and outriggers.

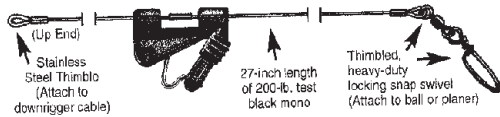

No.	Description	Price
OC1	Goldfinger Clip	\$8.98
DC1	Downrigger Clip	7.19
KC1	Kite Release Clip	8.98

DOWNRIGGER RELEASE ASSEMBLY

Ideal when trolling live baits or lures for everything from King Mackerel to billfish. The DCW1 is designed to be snapped directly on to your existing downrigger cable's snap swivel. The downrigger ball or planer can then be snapped on to the terminal end of the DCW1. When the baits or lures are being deployed, the ball or planer stays in the water while the clip sits above the surface where it can be easily loaded. This keeps the ball or planer from swinging around and damaging the boats hull.

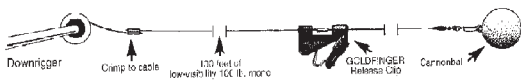

No.	Price
DCW1	\$15.28

LOW VISIBILITY MONOFILAMENT DOWNRIGGER RELEASE & ASSEMBLY

Use of mono line improves the strike ratio when downrigging for all gamefish, first by limiting the vibration otherwise created by wire cables, and second by decreasing gear visibility. The DCW-2 is designed to be crimped directly to your existing downrigger cable with special mini double crimp provided in the package.

No.	Price
DCW2	\$17.45

AFTCO DECK KEY

The "On Board" Tool that no boater will want to be without!

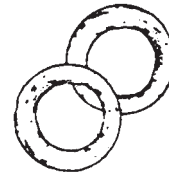

The new Aftco Deck Key will quickly become your "best friend" on board the boat. This tough, glass-filled 2.25" by 4.25" black nylon tool is designed to open your fuel and water deck fills (two sizes), remove garboard and drain plugs, unscrew any large slotted fitting—such as a freshwater fill or waste water drain—and it even has a convenient V-slot for shaking live baits free from "sabiki" bait rigs. The molded hole in one end makes for easy attachment to a key chain, key-chain "float" or lanyard so you can easily find your Deck key when you really need it!

WINRR1	\$47.00

AERATORS

10 1/4" Long: great for 48 quart coolers, 5 gallon buckets or shallow Live Wells. Used by top tournament professionals on the walleye trail.
 13 1/4" long: the most popular size turns 5 gallon buckets into great bait tanks, strong enough to handle up to 30 gallon Live Wells. High output, 19 1/4" long, the strongest Aerator on the market! Works great for big Live Wells and shad tanks. Has a rating from 20 gallons and up. All draw less than 1 amp DC, which is equivalent to a bow light on a small boat.

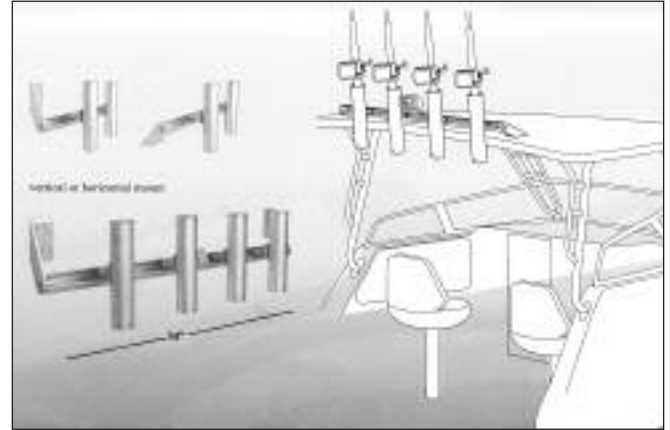

No.	Description	Price
10010	10 1/4" long	\$38.86
10014	14 1/4" long	40.20
10019	19 1/4" long	41.54

ROCKET LAUNCHER ROD HOLDER

- Fully adjustable rocket launcher that allows for both vertical and horizontal adjustment of rod holders.
- Includes universal equipment bracket for mounting lights, antennas, and other marine equipment.
- Corrosion resistant anodized aluminum.
- Patent pending.

No.	Price
WINRT1	\$195.00

BOARDING HANDLE

- This unique all stainless steel device fits in flush-mount fishing rod holders to provide a secure, yet removable handhold for use when coming aboard a vessel.
- Constructed of 1-1/4" and 1" thick wall tubing, it has a push button to disassemble for compact stowage.
- Fits into 30 degree flush mount rod holder.
- Electropolished to prevent corrosion.
- Also handy for holding shore-power cords or hoses off the deck while in the slip.

No.	Price
WINBH1	\$95.00

CABLE HOLDER

- Cable Holder is designed to keep heavy shore power cords or water hoses away from the water and off the gunwale.
- The thick walled stainless steel cable guide fits into most rod pole holders with a slotted stud located at the bottom.
- Fits into 230 degree flush mount rod holder.
- The holder's 2-1/2" eye keeps cords high enough to clear toe rails and railings and stands straight up as the pole is bent slightly.
- Electropolished to prevent corrosion, the Cable Holder is 28" high overall.

No.	Price
WINCH1	\$42.00

NEW STYLE BAIT AERATOR - THE "O2" BAIT SPA

Finally! A good quality, functional, reasonably priced and attractively packaged Bait Aerator! Features include:

- Molded high-impact plastic body - resists corrosion!
