

SPECTRON® “STRENGTH OF STEEL”

Braided with space age fibers. Spectron combines a revolutionary low stretch, polyethylene fiber with Cortland’s unsurpassed braiding technology. Features include: Incredibly low diameter to strength ratio • 50lb test is the same as 12lb monofilament • Approx. 4% stretch • Extremely low stretch creates unbelievable hook setting power • Superior abrasion resistance • Increased line capacity • Due to its low diameter you can hold significantly more line on your reel than with monofilament • The polyethylene fiber is naturally hydrophobic • It not only won’t absorb water - it repels it! • Amazingly limp • This is a superb bait casting and spinning line with absolutely no memory • Powerful casting performance • Its slick finish reduces drag/friction on your rod guides, adding greater casting distance • Highly sensitive resulting in more positive hook ups.

SUPER BRAID-BLACKSPOT

White line with black spots.

CORTLAND

FLEA-FLICKER™ MONO

Many years ago spiny water fleas invaded the Great Lakes water shed and made life miserable for trollers in three states! As the water warmed in late summer, billions of these exotics appeared, attaching themselves to any fishing line that came by! We started working with charter captains and avid anglers in Lake Ontario and soon developed a revolutionary premium grade light green mono with a special shape and high slip additive that is proven to reduce or eliminate the problem of water flea attachment to troller’s lines.

CORTLAND

C16 SUPERBRAID

Constructed using high-tech Spectra® fibers in a 16 carrier construction for an extremely small diameter to strength ratio. C16's 16 carrier braid construction and uniformed pick count (wraps per inch) is the perfect match for allowing you to quickly splice a few feet of mono, while maintaining line strength between the braid and the top shot. Cortland has also treated C16 with their proprietary "FIBER TECH" Superbraid Protection that dramatically increased the braid's durability and ensures consistent performance over time.

MASTER BRAID - "STIFF SUPER BRAID"

With almost 100 years of braiding experience and technology, Cortland Line is proud to offer the next generation of "Premium Super Braid"—Master Braid. A premium super braid constructed using all the best features of Cortland's legendary Spectron braided line, but with a unique coating that makes the braid permanently stiff.

Master Braid is constructed in a way that makes it rounder, which means less twist, greater accuracy, longer casts and extended life. A proprietary Cortland process bonds the color and finish into the fibers of the braid eliminating fading or flaking of the color and stiffening agent. With only 4% stretch, small diameter pound/test ratio and a unique hydrophobic coating that slices through the water and comes back dry, this new Master Braid delivers greatly enhanced fishing qualities and performance. Master Braid is very easy to use and works equally well on both spinning and conventional reels.

100% Fluorocarbon Leader on 50 yard wrist spools from 10 to 150 lb. test

FLUOROCARBON

Ande 100% fluorocarbon leader material has recently been introduced. 100% fluorocarbon at competitive prices. Manufactured with some of the leading edge technology available today. Compare to realize that no other product offered is any less visible, stronger or more abrasion resistant. Top quality, excellent knot strength at a great value. Available in sizes from 10 to 150 test in 50 yard spool.

- High-Impact Strength • Wears Like Iron
- Quattro Performance in 5 Solid Colors

Hi-Seas popular Quattro Plus camouflage fishing line provides excellent performance while retaining all the qualities that anglers have come to love, especially its ability to disappear underwater! Better than fluorocarbon at a fraction of the cost, Quattro Plus does for fishing line what camouflage clothes do for a hunter—it breaks up visual patterns so it blends into the background. Its unique formulation gives it incredible linear and impact strength with excellent abrasion resistance. It's one line that won't give up on you during the hottest bite. That's why Quattro Plus is the choice of so many top pros on the SKA Tournament Trail!

- Unique Low-Vis 4-Color Camo Line
- Super Strong, Virtually Abrasion-Proof
- Disappears Underwater
- Choice of Top SKA Tournament Pros

FLUOROCARBON

HI-SEAS Fluorocarbon is made from 100% polyvinylidene fluoride and extruded using cutting edge technology that gives it just the right combination of properties to make it the finest leader material you can buy.

- Matches light refractivity of water
- Virtually invisible underwater
- Abrasion resistant
- Faster sink-rate than mono
- Excellent UV protection

Black Widow has been a favorite with fresh and saltwater anglers since its introduction over ten years ago. It's a thin-diameter, premium co-polymer monofilament that incorporates multicolor extrusion technology developed by Hi-Seas polymer chemists so fish don't see it. But that's only one of the reasons you'll love it. Black Widow is a supple line that lies beautifully on any reel and casts with near zero friction. It has low memory, so it won't coil up after sitting on the reel for extended periods, and it's a tough line that provides solid fish-fighting performance. For the record-conscious angler, it's I.G.F.A. True-Test rated. Whether you jig for smallmouths, troll for walleyes, plug stripers, or chunk tuna, Black Widow is a proven performer that won't let you down when the fishing heats up.

- Micro-Thin Diameter – No Memory
- I.G.F.A. True Test Rated
- Unique 3-Color Camo
- A Favorite For Fresh & Salt Water
- Unmatched Casting Performance

Red Devil isn't just another hi-vis line, it's the brightest, easiest to see line you can use under any light conditions. Its fluorescent red color stands out above the water, but fades to near invisibility below. Yet, that's only part of the reason it is the biggest leap forward in monofilament line in a decade! This "next generation" monofilament is a unique blend of the most advanced polymers with silicone. The result is a softer line with a silky feel that is easier to tie and provides unparalleled knot strength. Its abrasion resistant qualities rival any of the stiff, hard-shell lines of the past. Red Devil offers today's angler a level of performance that leaves the competition back at the dock.

- Great for casting and trolling
- Glows above - disappears below
- Feels like silk - tough as nails
- Super-tough, no memory, extra soft
- Co-Polymer & Silicon formulation

PREMIUM LEADER

High strength Mono Leader

For everyday use in fresh or salt water, there's Premium Leader, the leader that's as at-home bottom fishing as it is trolling for tuna. An advanced monofilament extruded with properties that make it supple, yet extra tough – Grand Slam Premium Leader performs! Unsurpassed for tying rigs for everything from flounder fishing to deep dropping for monster grouper. Grand Slam Premium can be used as leader material for offshore trolling as well.

WHITE LIGHTNING

Advanced Co-Polymer

• Micro thin diameter • True-test rated • Supple, low memory • Reduced stretch • Great casting line

White Lightning is a true-test rated, fluorescent-clear, micro-thin diameter monofilament with sensitivity that rivals braid. White Lightning narrows the performance gap between mono and braid. It's engineered from a new copolymer matrix making it incredibly thin, remarkably strong, and yielding less stretch than many other mono lines. White Lightning has incredible knot strength using common knots, and its supple texture lays perfectly on spinning and conventional reels while flowing-off smoothly without tangles. Its diameter to strength ratio makes it a stand out, capable of handling big fish. White Lightning is perfect for freshwater applications – from ultralight outfits for trout and panfish, to heavier tests for fishing bass and walleyes. Its improved sensitivity means you'll feel the subtlest pick up and set the hook with power to spare. White Lightning is the line you can count on to provide the sensitivity you demand and the performance you deserve. Color: fluorescent clear.

GRAND SLAM

High Performance Fishing Line

- Ideal sensitivity & control • High knot strength • Abrasion resistant
- Smooth casting

From ultra-light to big game, Grand Slam is up to the challenge! Its formulation provides high impact strength, excellent abrasion resistance and superior knot strength. It's equally at home on conventional and spinning tackle. Every yard is computer checked for consistent diameter and breaking strength to provide you with an unequalled level of performance – performance you can rely on.
