

TITANIUM / IM700

The Revolution Strengthens

In 2000, Lamiglas integrated Titanium with high modulus IM700 graphite. The reviews are in and they're nothing short of phenomenal. These rod blanks are light in weight, high in strength, unparalleled in durability and more sensitive than any other rod ever! The properties of Titanium also include excellent fatigue resistance, positive dampening characteristics and superior corrosion resistance. IM700 Graphite is secured to the titanium with a special aerospace bonding agent creating a rod blank that not only transmits sensitivity more efficiently but also amplifies the most subtle sensations. There are no finer rod blanks for the serious fishing enthusiast.

XMG50 GRAPHITE

The Newest "Super" Graphite

Specially designed for our Esprit series, this new super graphite allows us to make smaller diameter blanks with faster action. The XMG50 utilizes a blend of high modulus graphite fibers to create a perfectly balanced, lightweight blank that is more sensitive than anything on the market today. We use this new material in our Esprit Concept Fly rods, and Esprit Concept Salmon/Steelhead series.

IM700 GRAPHITE

Advanced Engineering and Superior Design

IM700 is Lamiglas' proprietary rod blank material. This third generation graphite is made of extremely high modulus graphite and produces the ultimate in sensitivity, power, strength and durability. IM700 rod blanks come to you from Lamiglas in a rich black forest green finish with the highest quality components.

CERTIFIED PRO GRAPHITE

Remarkably Lighter and Stronger

Our broadest selection of rod blanks. They employ an all-new smaller-diameter blank design with an improved resin system to produce a 15 percent lighter weight rod than comparable graphites on the market. These rod blanks exhibit properties found only in second and third generation graphites. Superior performance at a great price!

FOR INFORMATION ON HOW TO QUALIFY FOR BIGGER DISCOUNTS & FREE FREIGHT ON BLANKS.

G1000 GRAPHITE

Traditional, Classic-Style Action

This is our most distinguished series of rod blanks. We use first generation graphite coupled with an improved resin formula to reduce overall rod blank weight while maintaining "classic" moderately fast actions. This series spans a broad range of actions, line ratings and specialty models to cover most fishing applications.

FIBERGLASS

E-Glass Earned Its Place In History

This material is structurally the most durable of the fiberglass family. E-Glass is available in both L rod (light) and H rod (heavy) varieties. The glass properties are expressly matched to each unique application - such as cranking rod blanks for bass; mooching and downrigger rod blanks for salmon, shark, tuna, stripers and king mackerel. We use the same epoxy resins and composites material technology in these rod blanks as we do in our graphite models to offer you lighter weight and improved sensitivity over other manufacturers' fiberglass rod blanks.

"TRI-FLEX"

Exclusive Graphite/Fiberglass Composite

Features our proprietary Tri-wall construction. Unequaled, high quality E-Glass rod blanks are externally and internally reinforced through the butt and mid portion of the blank with graphite to reduce overall weight by 30-50% depending on the model. The tips are lightening fast and softer so they cast live bait as well as throw heavy iron, while the graphite reinforced portion of the rod blank gives tremendous fish fighting control and lifting power.

S-GLASS/GRAPHITE COMPOSITE

Classic Design Offshore Fly Blanks

A low modulus graphite core is covered by an outer layer of caramel colored S-Glass to create a blank that is incredibly strong and powerful yet still has the ability to cast larger saltwater patterns. Currently available are 4 pc. spigot ferruled fly blanks in 8-15 weights.

Lamiglas S-Glass is an amazingly sophisticated type of fiberglass that approaches graphite in lightness of weight and sensitivity at about half the cost of graphite. It has 25% higher modulus than regular fiberglass which gives it faster recovery with lighter rod weight. S-Glass Blanks are one of the finest values in blanks today; lightweight, sensitive, economical. An excellent blank for building a fine fishing instrument when you want more than standard fiberglass.
